

LMZ Coin Electricity Meters

LMZ coin electricity meters are used for pre-payment of electricity e.g. in tennis courts and other sports facilities/

The prepayment meter can be set by the customer. Energy amounts (KWh) and the number of coins can be set. After insertion of the coin the display will show the released energy amount. The contactor switches on at the same time. The energy amount will be reduced in steps of 0.1 kWh each. The energy amount will be increased if additional coins are placed into the slot.

Features

- Pre-Payment of Electricity using Tokens
- Profile and standard token versions (currency versions available on request)
- 2-Line LCD display the remaining amount
- Robust stainless steel enclosure with high quality lock
- View window to the calibrated meter
- Any number of coins can be inserted until the maximum value of 999.9 kWh has been reached
- Simple setting via logical menu

Model Type	Model	Description
	LMZ-0436-S	LMZ Coin (token) Electricity Meter 3 x 63A, Standard Token
	LMZ-0436-S	LMZ Coin (token) Electricity Meter 3 x 63A, Profile Token
Technical Data	Supply Voltage	230V, 5VA
	Metered Current	3 x 63A
	Metered Voltage	3 x 230/400V
	Switching Capacity	40kW (AC1)
	Display	LCD Display Showing remaining energy, the coin selection and coin type
	Enclosure	RAL 7035 Stainless Steel with Cylinder Lock
	Coin Value	1 to 999.9 kWh for Each Coin
	Weight	5 kg
	Mounting	Wall Mounting
	Dimensions	W220 x H330 x D150 mm
