

## ZMZ 'Wash'n Dry' Timed Electricity Meters

ZMZ timed coin electricity meters are used for pre-payment of electricity e.g. in laundrettes, tennis courts and other sports facilities.

The prepayment meter can be set by the customer. The time for each coin and the number of coins can be set. After insertion of the coin the display will show the available time. The contactor switches on at the same time. The energy amount will be reduced in steps of 1 s each. The remaining time will be increased if additional coins are placed into the slot.

### Features

- Pre-Payment of Electricity using Tokens
- Profile and standard token versions (currency versions available on request)
- Maximum Time 99hrs 59 minutes and 59 seconds
- Smallest adjustable unit 1 second
- Simple setting via logical menu

| Model Type            | Model                      | Description   |
